239 Nautilus Dr. Apt. 213

New London, CT 06320

Most Recent Professional Experience and Coursework

Master Blaster, Open source — *Developer*

June/July 2020

Wrote an open source application in Python for batch renaming of branches for GitHub repos. github.com/Twitchkidd/master-blaster

Learn Node, learnnode.com

APR 2020

Another Wes Bos classic! Solid build of a 'Mongo, Express, Pug, Node' stack app, learned Mongoose JS driver and MongoDB query strategies.

Lyme Art Association, Old Lyme, CT — *Developer*

Feb 2020

Wrote custom HTML/CSS/JavaScript to add functionality to an images collection widget from Shopify on the client's WordPress site.

Beginner JavaScript, beginnerjavascript.com

JAN 2020 - FEB 2020

Brushing up on the basics, with Wes Bos! Reviewed familiar material, improved knowledge of async JavaScript and networking techniques.

Logoed, Huntington, NY — *Design/Development*

Apr 2019 - Oct 2019

Product definition, strategy, and development at a small startup, explored pros and cons of React Native versus progressive web apps in detail.

Moodbit, New York City, NY — *Developer*

Nov 2018 - Feb 2019

Developed the next version of the dashboard for a startup. Wrote production React including visualizing data from the Slack integration.

Core Tech Stack

HTML5, CSS3, modern JavaScript, React, React Native, Node, Express, MongoDB, Git, GitHub, Linode, Auth0 and Figma

Also Familiar With

Hapi, RethinkDB, redux, Gatsby, GraphQL, WebRTC, WordPress, BlueHost, Digital Ocean, AWS (DynamoDB, S3, Cognito, Amplify, AppSync, MobileHub), and Sketch

Side Projects

garethfield.com: Homepage on the Internet, built with Gatsby, mostly used for blogging my coding adventure for my own entertainment and also future reference.

Run Club: Platform to make posting and joining group runs easy and safe. Has yet to be launched, but we can't have group runs right now anyway, there's a pandemic. Next up in development is refactoring from express routing to react-router@6
